

Machine Building Line Card

Explore the industry's broadest portfolio of industrial solutions with products designed to improve machine performance and uptime. Whether on-machine or on the connected network, Belden products offer maximum uptime, safety and security for your mission-critical infrastructure.

- Especially designed to retain unmatched signal quality through bending, twisting, crushing and exposure to moisture, chemicals, UV rays and extreme temperatures
- Includes Belden's industrial Ethernet, Databus, multiconductor, VFD, flex, tray, instrumentation and control and fiber cables

- Alpha Wire products are engineered to offer superior performance, flexibility, and reliability in motion control and robotics applications
- Alpha Wire's Machine Building portfolio includes Xtra-Guard Flex cables designed for high-flex, high torsion, and continuous-flex applications with 1 million to 14 million flex life cycles and custom cables that can be designed to meet application-specific requirements

- Hirschmann's broad portfolio of ruggedized switches, routers, security and wireless devices addresses Machine Builders' unique challenges: Withstanding environments with high dust, heat, and vibration, navigating tight spaces, and guaranteeing maximum uptime
- These future-proof solutions allow Machine Builders to stay ahead of industry trends such as Ethernet adoption and increased bandwidth needs

- Lumberg Automation offers a complete connectorized plug-and-play solution for industrial applications
- The portfolio consists of connectors, receptacles, splitters, and IO systems designed to stand up to the harshest surroundings, such as dust, water, and heavy vibrations
